### 'The Joy of Pure Water'.

It made it all worthwhile when I saw the smile on my wife's face when she experienced for the first time the crystal clarity of the glassware and cutlery after dishwashing with our first batch of water made with our new seawater Reverse Osmosis Desalination System.

It wasn't an easy decision to choose a local product over the long standing list of imported products when we fitted Rowater Australia's Seababy MkIII Water Purification System to our Fleming 55 Pilothouse Motoryacht.

The Seababy's low cost, compact, quiet, efficient and beautiful design makes it an enviable choice over its imported counterparts.

I now see the envy on my fellow boat owners faces when servicing and maintenance issues require them to deal with an overseas company, when my supplier is just a few doorsteps away.

The experienced and professional team at Rowater Australia has excellent knowledge and skills in water treatment and provided me with a sound, honest and practical solution to my needs which is above all reliable and efficient.

Our vessel is now completely self sufficient with its water needs, manufacturing superb water at less than 200 ppm solids, without the need for reliance on mains water.

Yours Sincerely,

Peter Buik  
Director  
Rendezvous Adventures Trust.
