## Welcome

Well, hasn't the time flown by, we are already in Spring 2007 and into the second edition of our quarterly newsletter. We had a great response to our first

newsletter with many people taking advantage of the Aquanova promotion. It was so popular we have decided to run it again. Purchase any book of Aquanova tickets and receive the 6th ticket at no charge.

That's a 20% saving off the price. This offer must be mentioned when purchasing tickets and is valid for the

month of October 2007 only. The other great offer in last quarters newsletter was the floor standing dispenser for 12 month rental for

just \$99. Due to an increase in charges, this offer must end soon. Contact me, Di, at the office to secure yours now.

- High Grade and Premium Distilled Demineralised Waters
- Purelle Drinking Water and Oxygen enriched Aquanova Water
- Design, Manufacture and Servicing of Reverse Osmosis Units for domestic and industrial applications
- Deliveries of bulk water, 200 litres +

# Do You Drink 8 Glasses Of Water A Day?

Throughout winter I received telephone calls from some of our regular customers who didn't need as much water through the cooler months as they did during the warmer months. Did you know that your body still needs as much water in winter as it does in summer? 8 glasses a day may seem like a lot to swallow but developing a routine is the key. Drink 2 glasses of water first thing in the morning; you'll feel energized. Drink 1 glass of water half an hour before meals. It will help you feel less hungry and lead to fewer cravings. Drink 1 glass of water for each glass of beer or wine and 1 with every glass of tea or coffee. Cheers and Good Health to You.

## Not All Water Is

Water is odorless, colorless and tasteless, or it should be! Drinking water can help you burn fat, beat a fever, improve your complexion, relieve constipation, build muscle, drain a stuffed nose, fight a stomach ache and improve your mood! Whilst we can all grumble about water restrictions in our gardens, we must be thankful

**One sixth of the worlds population doesn't have access to safe drinking water, that's 1.1 billion people.**

that we have the technology to improve water quality to such high standards. Sea water, salty bore water and other sources of seemingly unusable water can now be

## Created Equal

easily produced into high quality drinking water.

Reverse Osmosis systems are being widely used throughout Europe, Asia and Africa making the best of the scarce water resources in the world. Units can produce water for personal use or supply water for an entire town population.

## Tell A Friend

The old adage still applies, if your happy with our product and service, tell a friend, if not tell us! We pride ourselves on Customer Service and Satisfaction.

Rowater High Grade Water is the only water that meets the requirements of ALL Autoclave Manufacturers Warranties and Aquanova drinking water is the only RO water with added oxygen which may benefit in exercise or illness recovery.
