

# ROWATER AUSTRALIA

## Christmas and New Year Opening Times

Well, it's that time of the year again! Santa is in the stores, the weather is warming up and the Christmas New Year Break will soon be on everyone's minds.

Rowater Australia will close on Wednesday 24th Dec 2008 and reopen on Monday 5th Jan 2009.

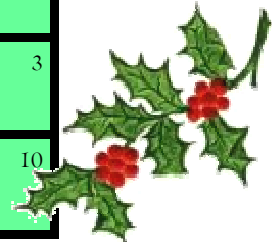

Please note: There will be no water deliveries on Thursday 25th, Friday 26th, Monday 29th, Tuesday 30th or Wednesday 31st of December, or on Thursday 1st January or Friday 2nd January.

If extra water is required over the holiday period, please advise us of your needs as soon as possible.

## AQUANOVA for Summer

If you currently have Purelle delivered, with the busy summer months ahead, have you thought of upgrading your water to oxygen enriched Aquanova?

The added oxygen may benefit exercise and illness recovery. It may give you the extra boost required to get you through the busy social calendar. Remember that experts recommend 8 glasses a day but if you are exercising or out in the heat, you may need much more.

Your blood is comprised of 95% water, muscle 75%, bones 22% and fat cells 14% water. The average male is comprised of 60% water and average female 55% water so keep well hydrated this summer and all year around by drinking pure fresh water from Rowater Australia.

## Public Holiday Notification

We celebrate Australia Day in 2009 on Monday 26th of January. As such all deliveries scheduled for that day will be delivered on Tuesday 27th January 2009 instead. If this is not suitable for you, please advise the office as soon as possible on 8371 4588 or [info@rowater.com.au](mailto:info@rowater.com.au)

**Rowater Australia** is a South Australian owned company with over 22 years experience in the water industry. A founding member of the Water Industry Alliance and now with TQCSI and HACCP Accreditation, we are proud of our manufacturing capabilities and are market leaders in providing customised water solutions for all your needs. Contact us on 08 8371 4588 or [info@rowater.com.au](mailto:info@rowater.com.au)

## Did you know??

- 70% of the earth is covered in water
- Less than 3% of that is fresh water
- More than 2% of that is frozen
- Polluted water kills more than 24 million people per year, 90% of these are children under the age of 5 years
- Over 90% of the worlds supply of fresh water is located in Antarctica
- By the time we feel thirsty, our body has already lost over 1% of its total water amount

**Any ideas or comments for the next quarterly edition of Rowater's Newsletter, please contact Di in the office on [info@rowater.com.au](mailto:info@rowater.com.au)**

## Containerised Unit bound for Africa

A reverse osmosis unit housed in a 20 foot long shipping container is the latest project from Rowater Engineers bound for Africa. The unit can produce up to 1500 litres of drinking quality water per hour which is enough to supply operations for 100 personnel who are in the mining industry.

The water treatment offered is a combination of reverse osmosis and micron filtration. The system is fully automatic and requires minimal attendance apart from the occasional filter cartridge replacement, sanitising chemical supply and general preventative maintenance.

Different angles of the containerised RO unit designed and manufactured by Rowater Australia.
